

Assignment 4 and 5

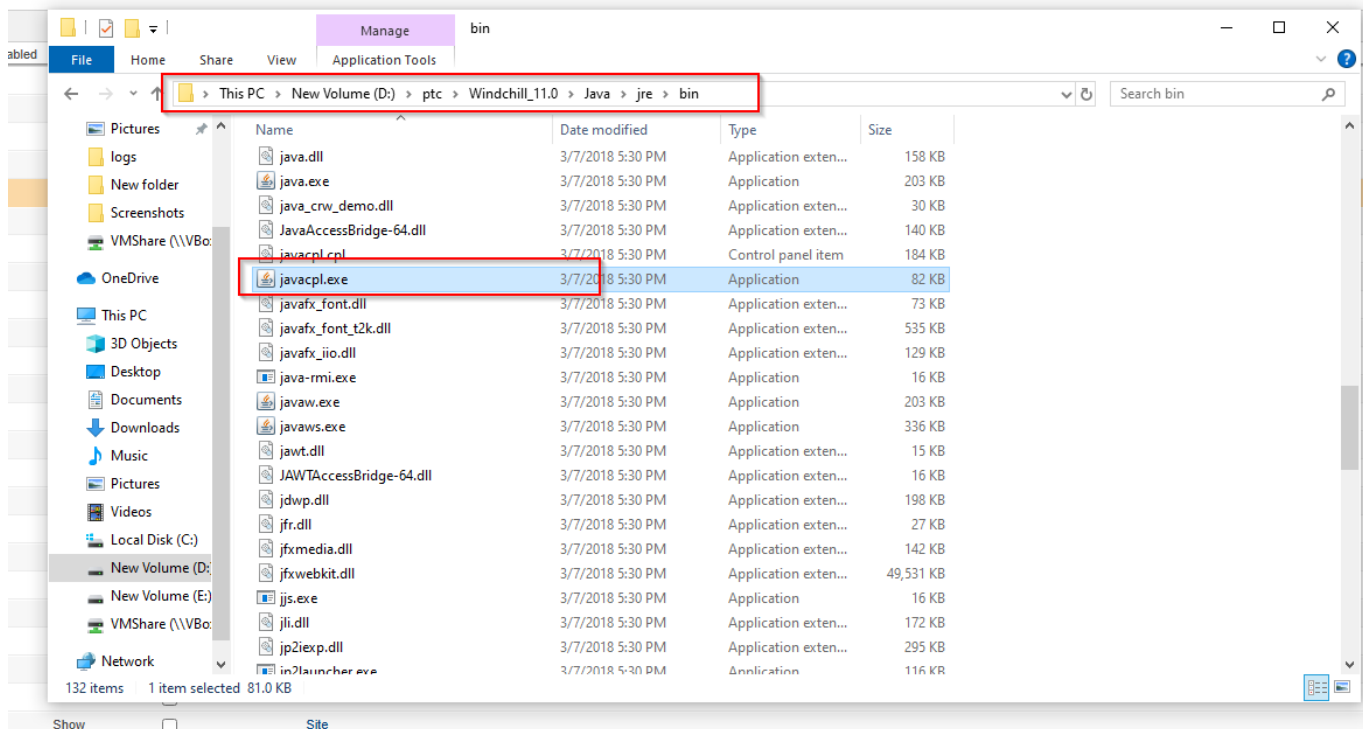

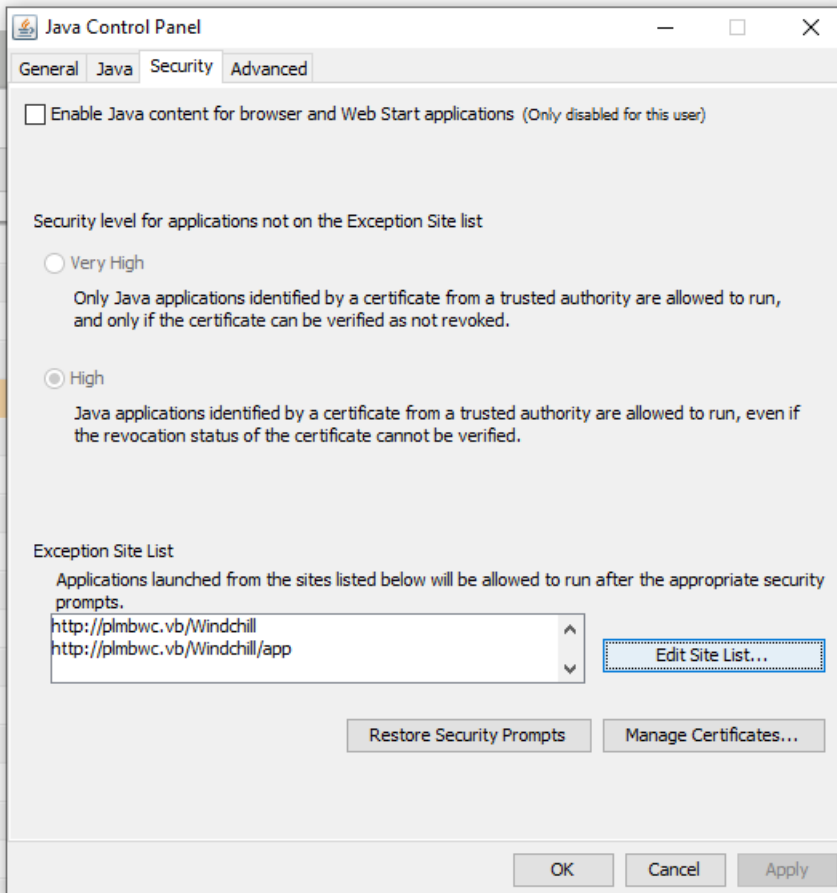

Assignment-4

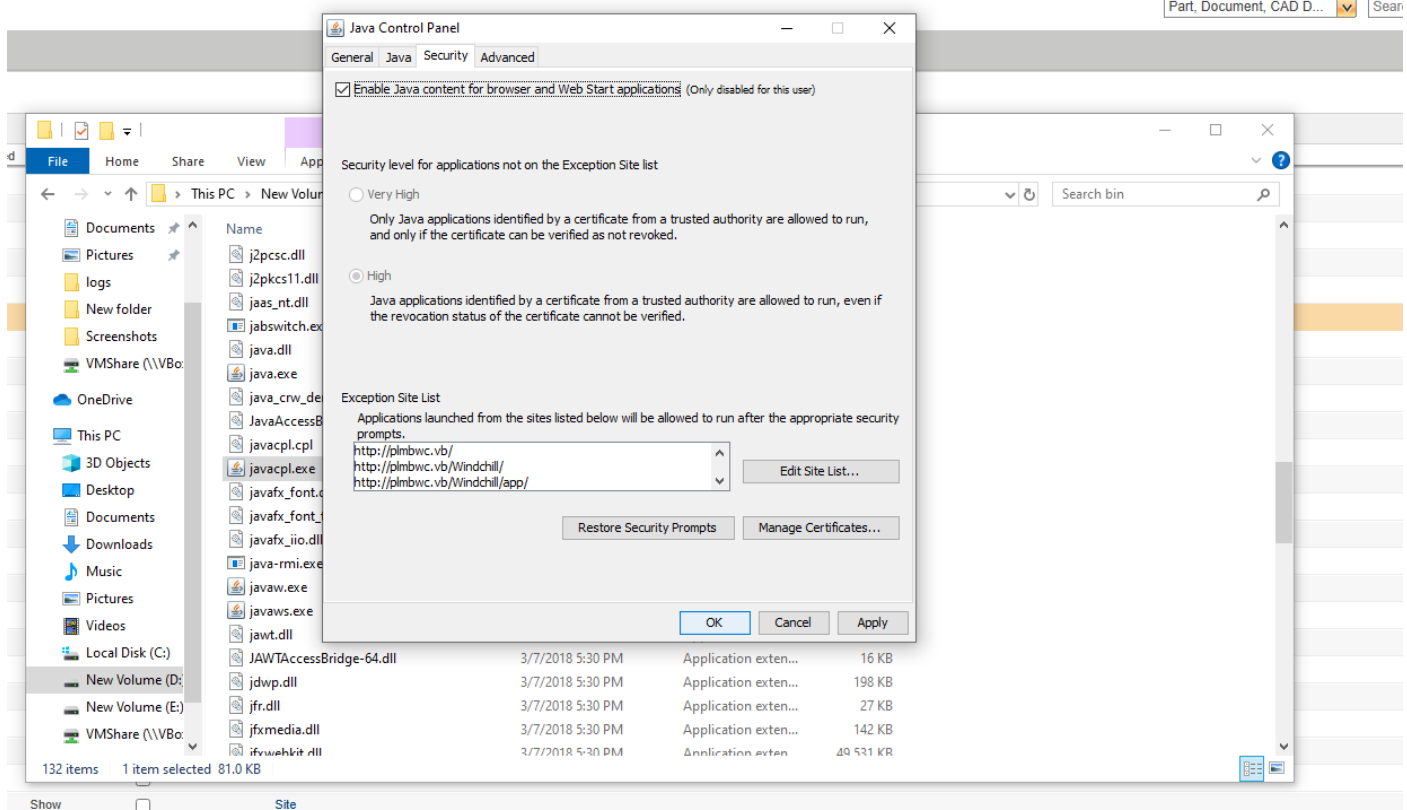

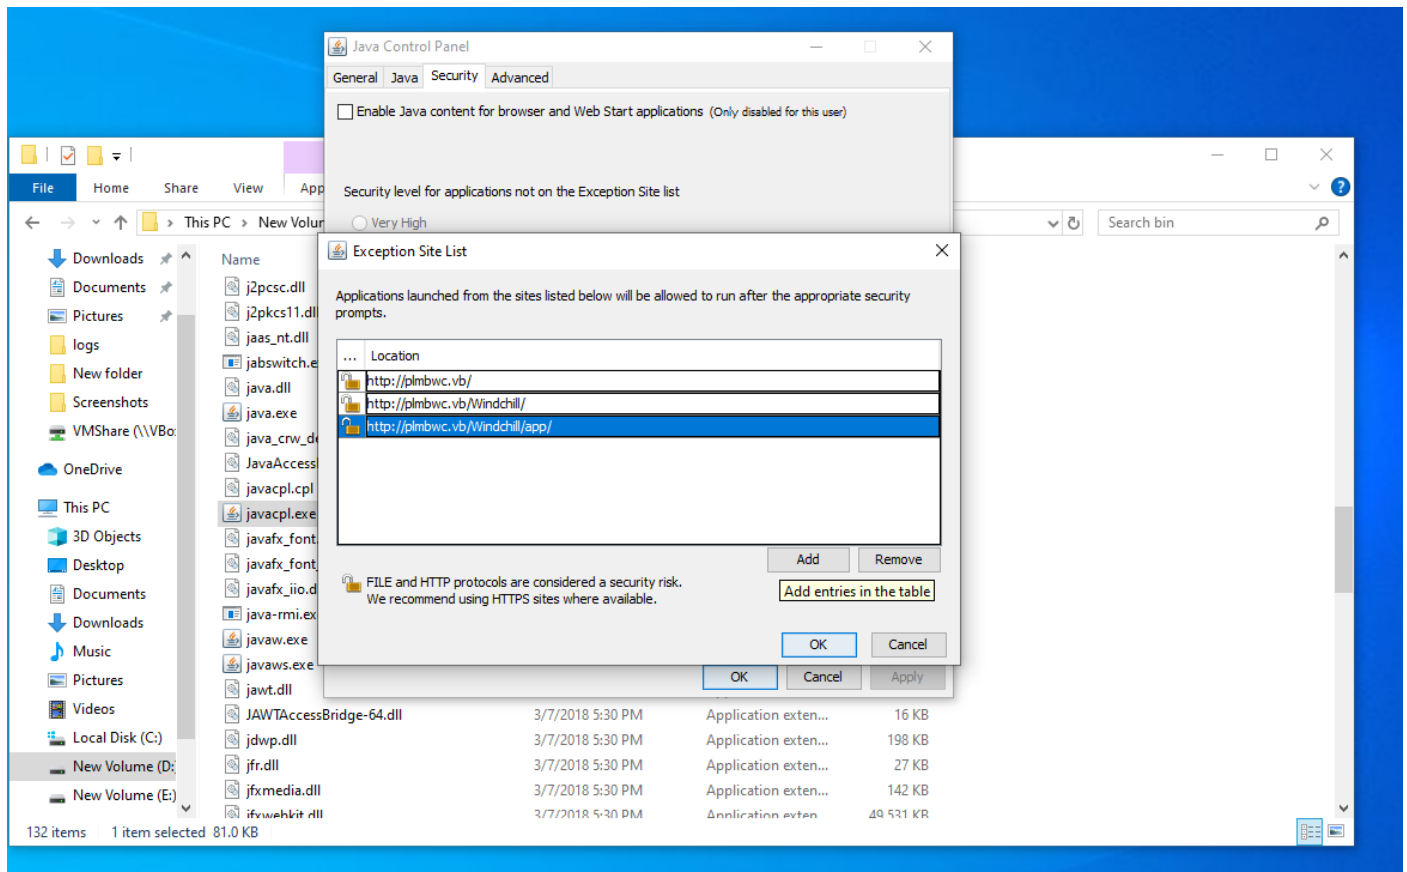

- create BASIC Life Cycle template / and Advance Life Cycle template with the Workflow
-

Assignment-5

- Create a workflow containing two activities at org level
- 1st activity name: Review Part
- 1st activity participant: Designer role
- Completion required by any of the user
- 2nd activity name: Approve Part
- Participant: Approver
- All users are required to complete this activity
- Now, create a team template at Organization level, name it as: organizationname_Team
- Mention this in your part Oir
- Have designer and approver in this team template.
- Test the workflow in different products containing different users in the context team roles and
- make sure workflow works as expected

System Administration

- Adapters Administration Manage life cycle templates state mapping for the Requirements Management integration with Integrity.
- File Server Management Download light-weight file server installers and manage file servers
- Import/Export Management Manage the exchange of file data and metadata with other systems via XML files.
- Mapping Management Manage mappings to be used during package import.
- Purge Management Create and manage purge jobs.
- Replication Scheduler Create/Update replication rules and schedule replication sessions.

Business Administration

- Business Rules View the business rules.
- Introduction to Numbering Schemes View information on how to control numbers generated for objects.
- Introduction to Versioning Schemes View information on how to control identifiers generated for object versions.
- Life Cycle Template Administration Create and manage life cycle templates used for defining the phases and transitions of various business objects.
- Object Initialization Rules Administration Create and manage XML rules for object initialization that set default values for attributes and display characteristics that constrain attribute values.
- Participant Administration Support creation and modification of Windchill business objects describing users, groups, and organizations.
- Policy Administration Manage administrative domains and the access control, indexing, and notification policies.
- Preference Management View and set preferences.
- Promotion Preference Management View, create, and edit promotion preferences.
- Publish and Thumbnail Control Controls WVS publishing.
- Report Management Create, update, and delete reports using the QueryBuilder tool. A report is the output of a predefined search and is used for generating statistics and metrics against business information.
- Team Administration Create and manage team templates. When creating a life cycle-managed object, you can use a team template as a base for the team participants throughout its life cycle.
- Type and Attribute Management Manage type definitions, attribute definitions, measurement systems, and quantities of measure. Users with the appropriate permissions can create, modify, or remove types or attributes. Additionally, u those attributes.
- Visualization Configuration Administration Manage WVS configurations including Creo View preferences, watermarks, printer configurations, dynamic groups and publish rules.
- Workflow Template Administration Create and manage workflow templates used for automating processes, in which information, tasks, and documents are passed among participants, within the context of specific business objects.
- Workflow Process Administration Search for workflow processes and view activity and task level details. Restart stalled workflows, terminate or delete workflows.
- WVS Job Monitor View the status of WVS Jobs.
- WVS Job Scheduler Administration Create and execute WVS jobs.
