

Assignment 5:

1.1 Create a workflow containing two activities at org level

* 1st activity name: Review Part

* 1st activity participant: Designer role

* Completion required by any of the user

* 2nd activity name: Approve Part

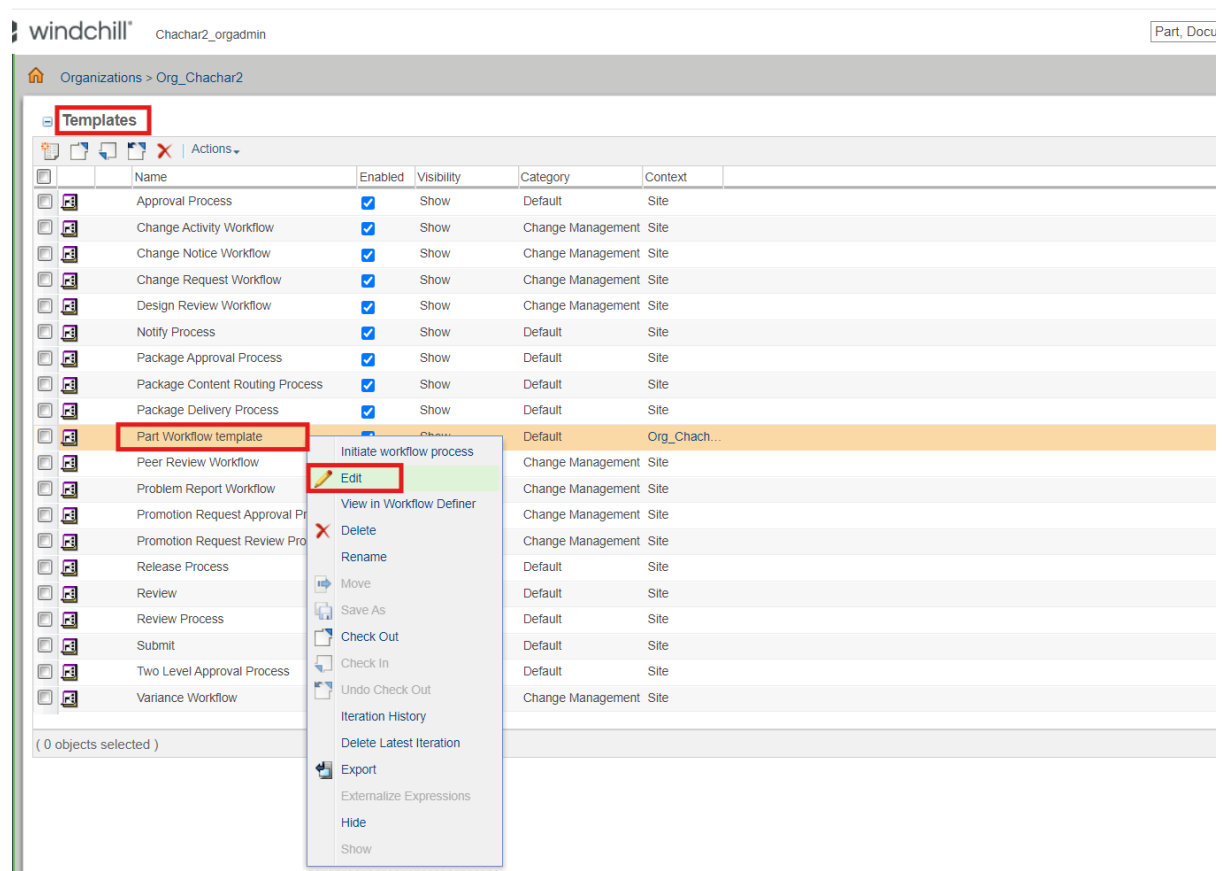

* Participant: Approver

* All users are required to complete this activity

1.1 Ans:

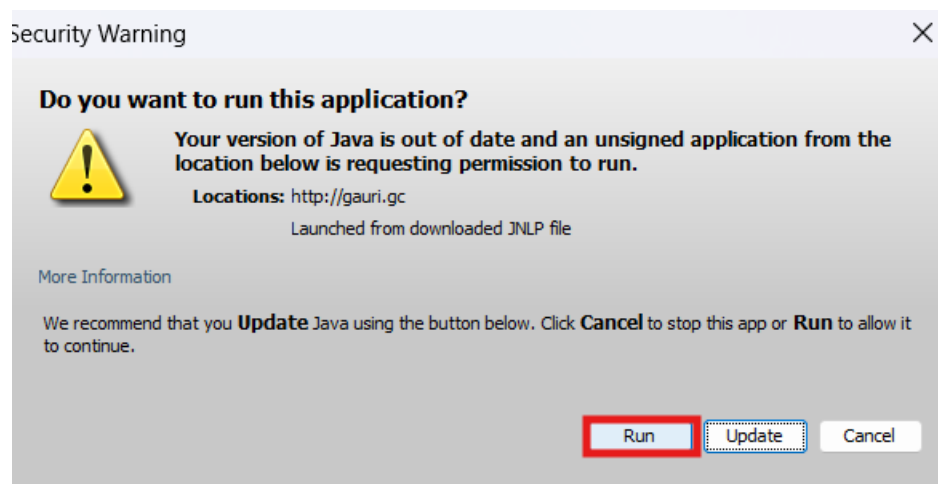

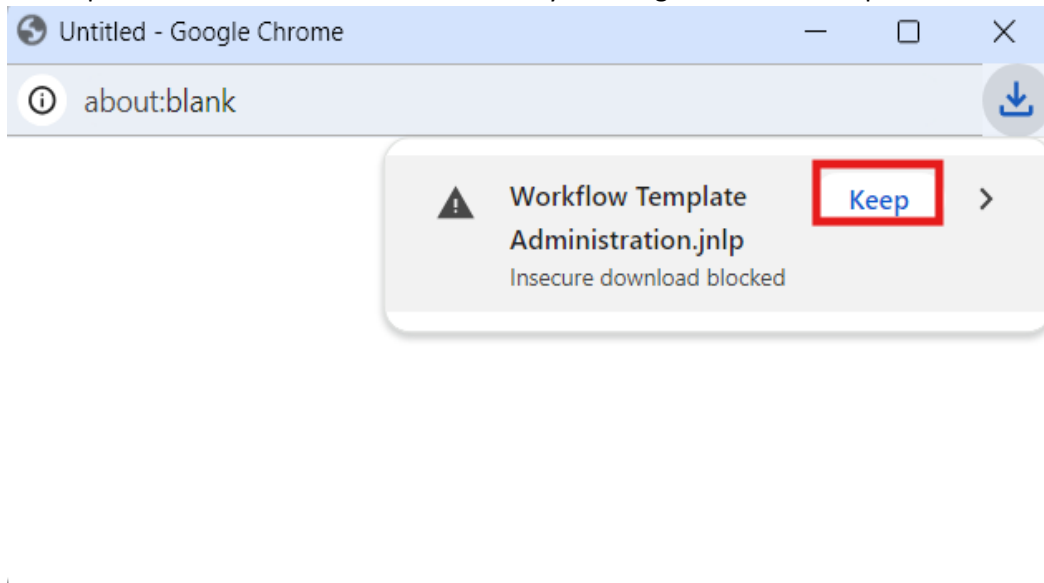

Now create workflow from simple to complex as follows:

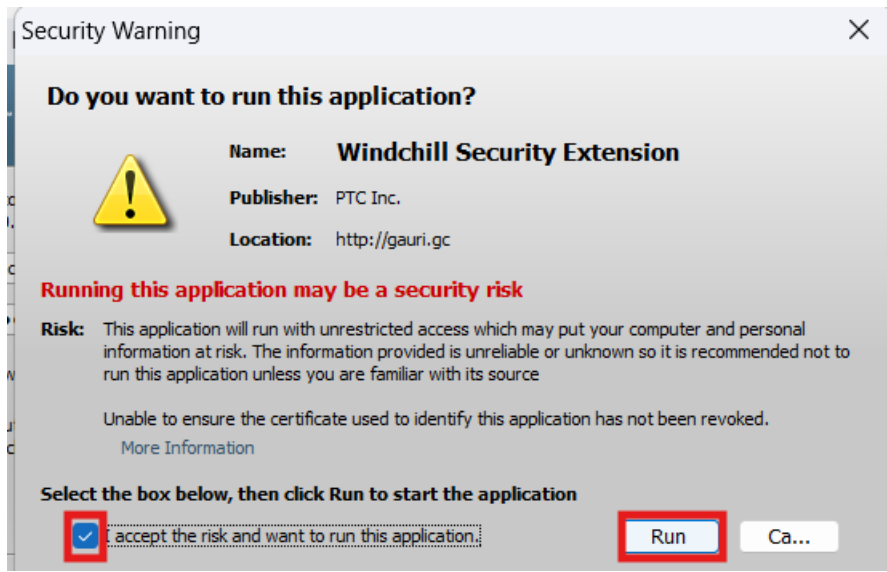

Step 1: Login as Orgadmin (Chachar2_orgadmin) -> under Organization -> Utilities -> Workflow Template Administration under Business Administration -> You can find the workflow you have created before in the templates.

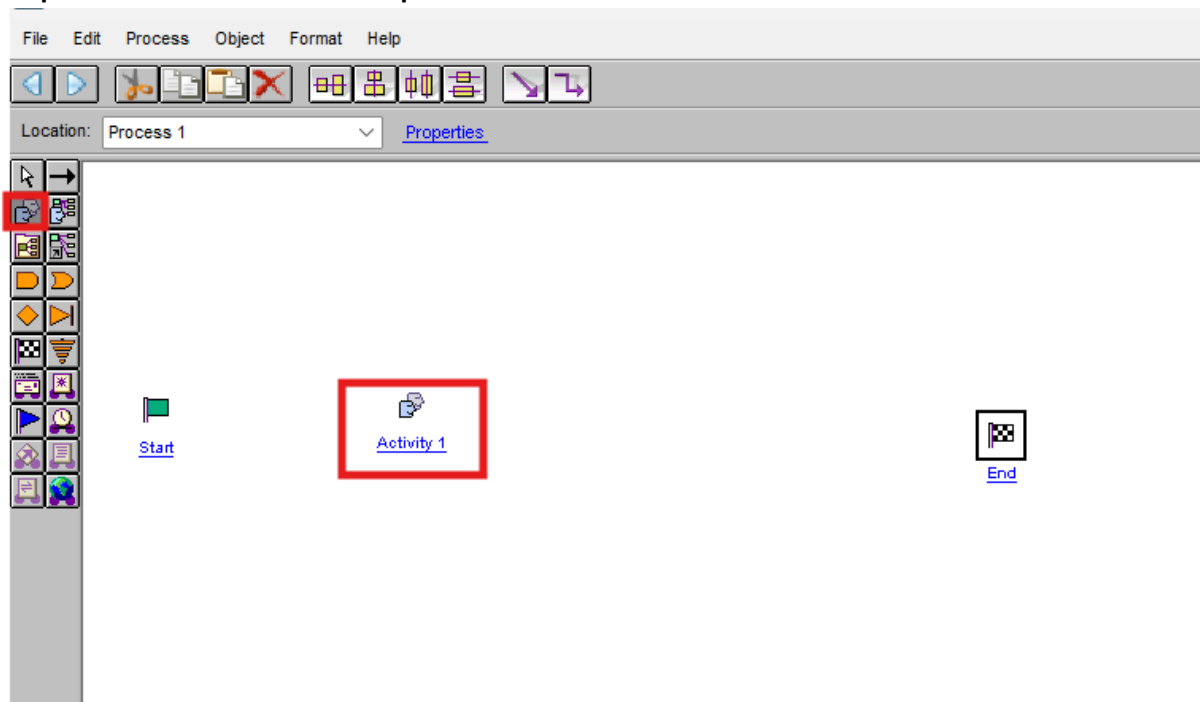

Step 2: Right click on the WF template & edit it -> Keep WF template -> Login with Java Oracle

developer -> Click on Run to allow the Security Warning to continue the process.

Step 3: Create the Workflow template:

Steps as follows:

Step 3.1: Add the Activity -> Double click on Activity 1-> Activity Box Pop-ups add the details under

General Tab -> Give the Name of the Activity 1(Review Part) given in the Question.

The screenshot shows the 'All Approver should Complete' dialog box with the 'General' tab selected. The 'Name' field is set to 'Review Part'. The 'Category' is 'Default' and the 'Responsible Role' is 'Process Initiator'. The 'Description' field is empty. The 'OK', 'Cancel', and 'Help' buttons are at the bottom right.

*Name: Review Part

Category: Default

Responsible Role: Process Initiator

Description:

OK Cancel Help

Step 3.2: Under Participants -> Roles -> Designer -> Click the check box & Add Any under Required Column, then Click on Ok.

The screenshot shows the 'All Approver should Complete' dialog box with the 'Participants' tab selected. The 'Roles' list on the left includes 'Designer', which is highlighted. The 'Required' column in the table has a checked box and the text 'Any'. The 'Required' dropdown on the right is set to 'Any'. The 'OK', 'Cancel', and 'Help' buttons are at the bottom right.

```

1.2 Now, create a team template at Organization level, name it as: Organization name_Team

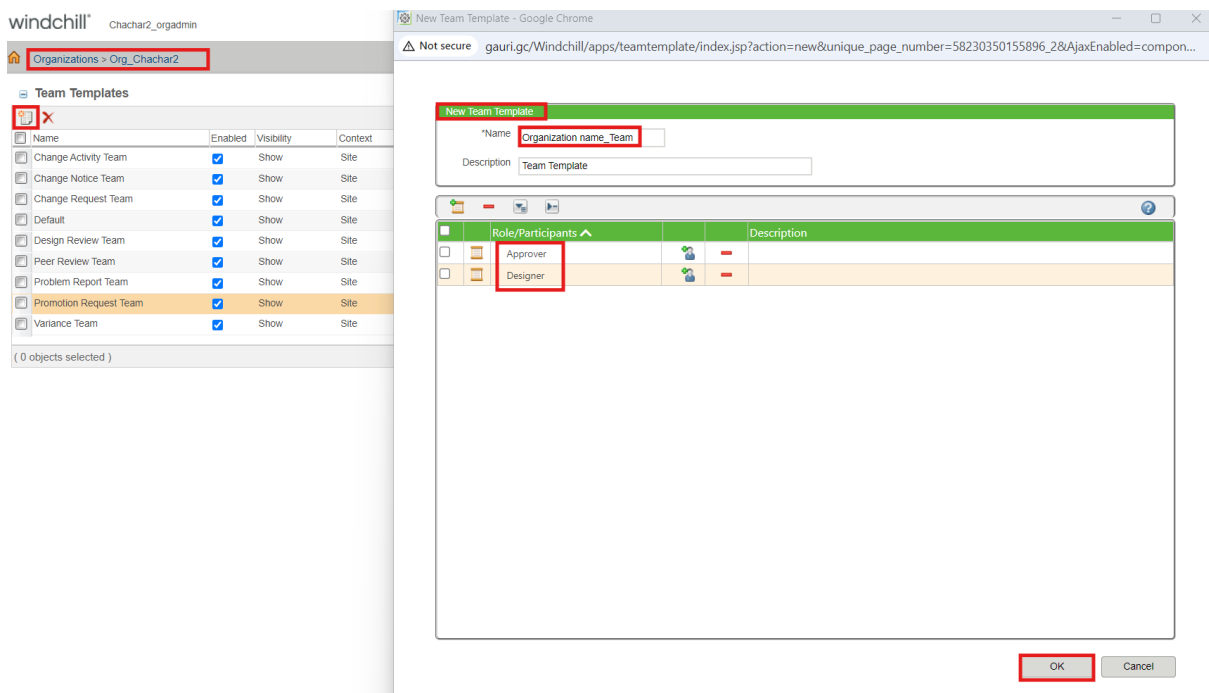

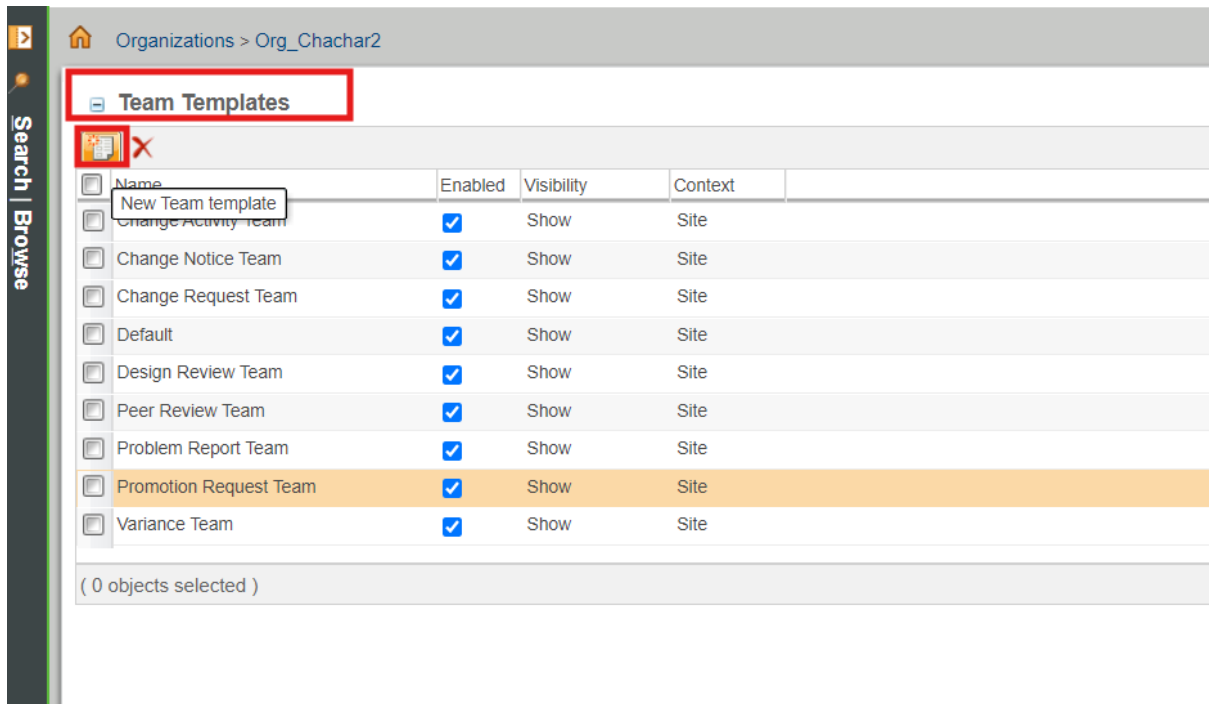

Mention this in your part OIR

Have designer and approver in this team template.

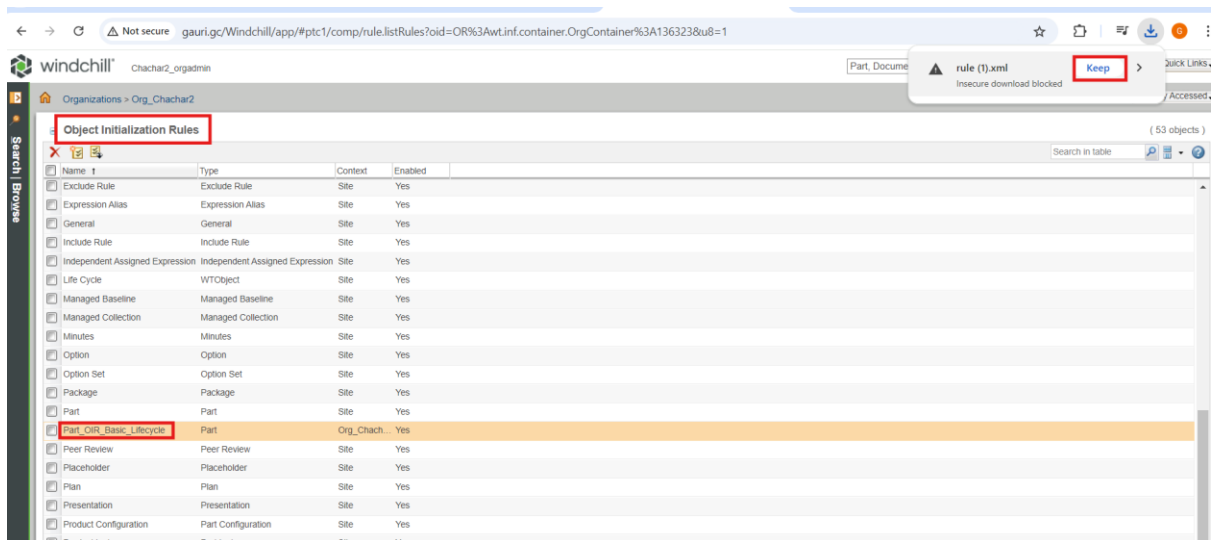

Test the workflow in different products containing different users in the context team roles and make sure workflow works as expected

1.2 Ans:

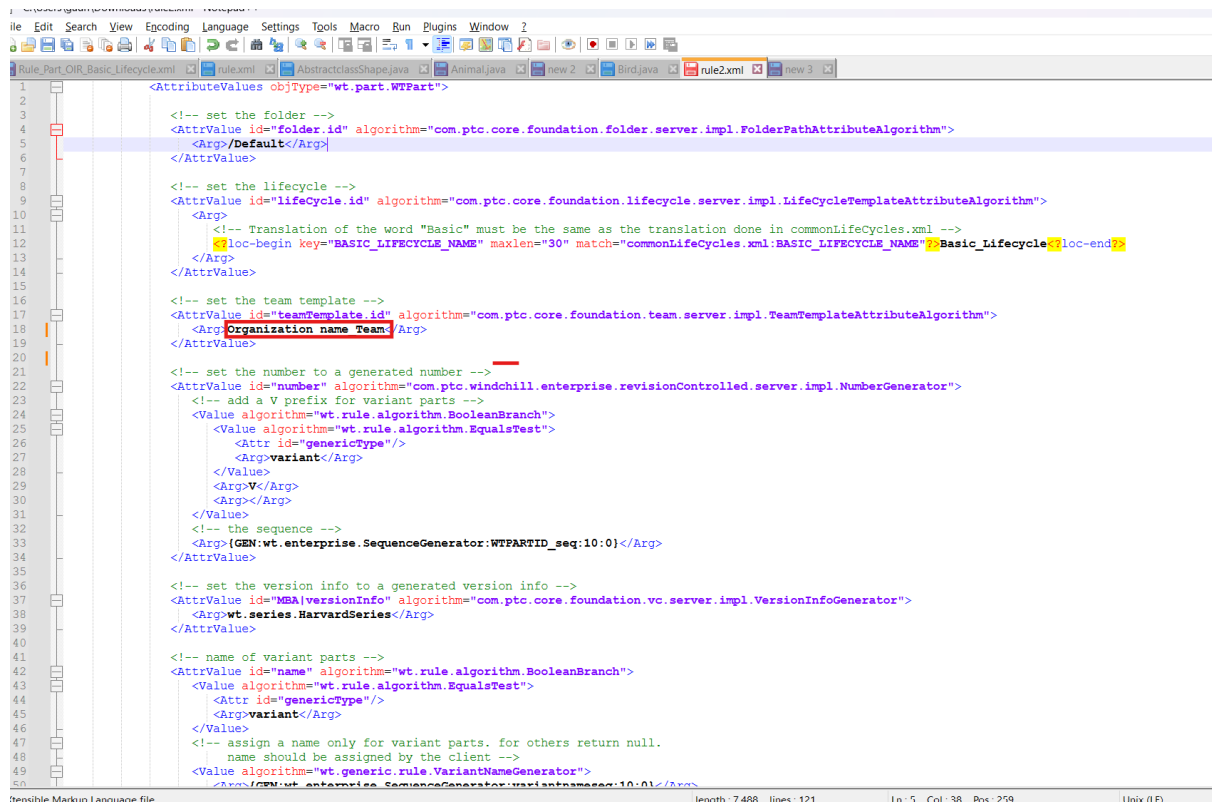

Step 1: Login Orgadmin(Chachar2_orgadmin) -> Utilities -> Team Administration -> create a New Template -> Give Name as per given requirements(Organization name_Team) & Add RoleParticipants as per the requirements(Approver & Designer) -> click on Ok.

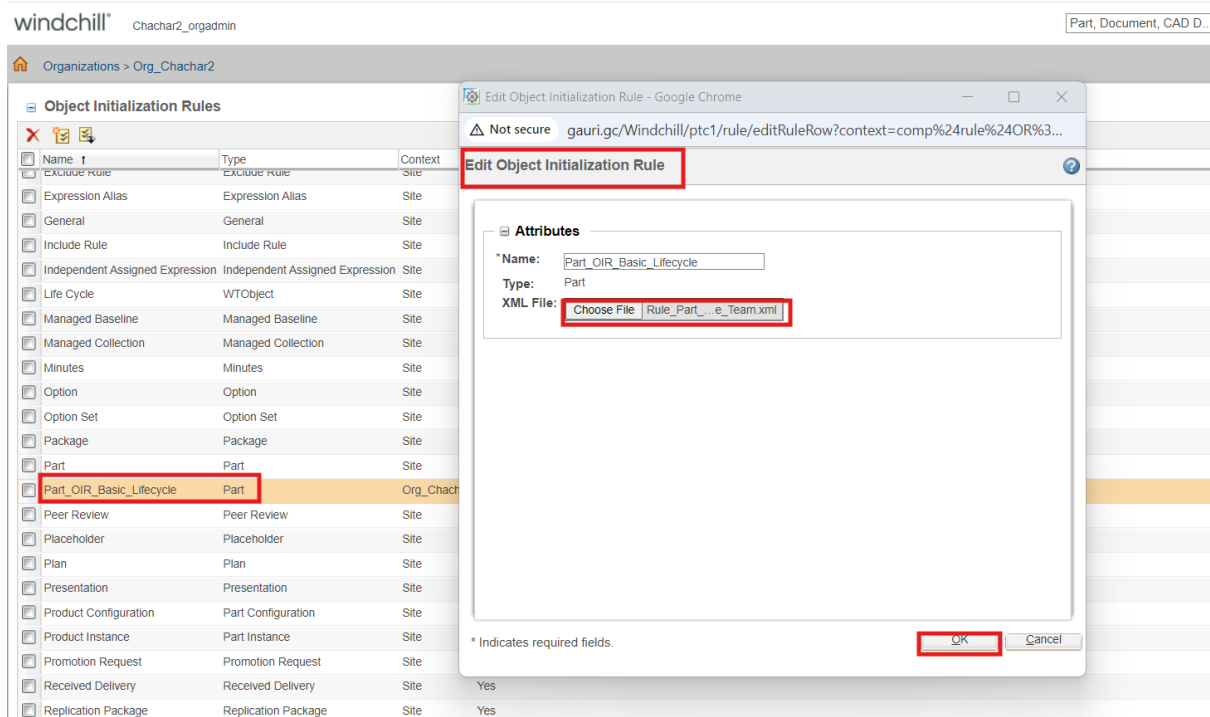

Step 2: Go to Utilities -> Object Initialization Rules -> choose the one OIR you have created (Part_OIR_Basic Lifecycle) -> Download -> Keep it.

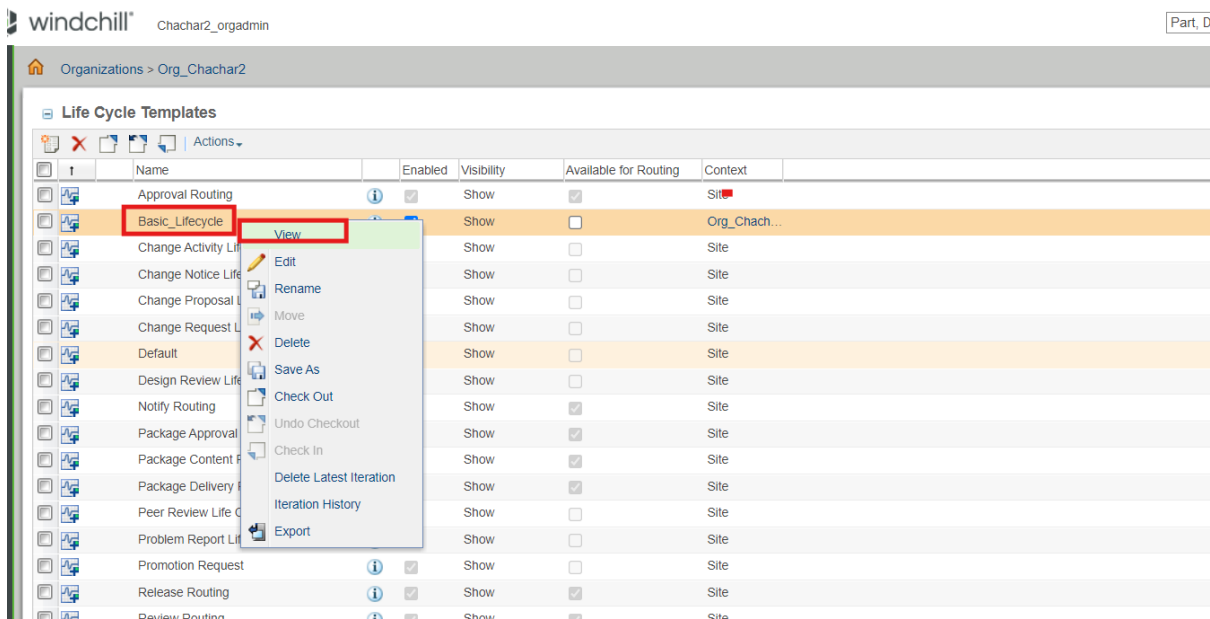

Step 3: update the new template Id: Organization name_Team -> save this file & upload it in OIR by replace the old one to new.

Step 4: Now check Utilities -> Lifecycle templates -> Basic_Lifecycle -> View it -> Keep it -> the check the Workflow.

Step 5: Now create a new Product under Chachar2_Organadmin -> Give Name, Template -> Click on Ok. You will find the product gets created under Folder.
