

Adding a Custom Action Item.

1. In the details page of org we have a actions button, in this button add a new action item
2. Map this action item to action model and JSP Files.

Steps :

Steps in creating a new Action items and action models.

1. Add the action in custom-actions.xml file
2. now add the implementation part of it in the custom-actionModels.xml file.
3. Stop the server
4. clear the tomcat instance and restart the server
5. now add the jsp files in the netmarkets and jsp folder (create new folder inside the jsp folder and save the jsp files).

Adding a custom action model for part actions.

Steps :

1. Go to parts, information page and click actions, in the end click on "more part actions" Action Model Report
2. In the report page look for Action model Name, defination file (File location), and Menu For from the report page.
3. copy the action model name ex (more parts actions) for WTPart
4. go to the [Functionality (Part in this case)]-actionmodels.xml file and open both action.xml and actionmodels.xml file
5. Copy the files and paste it in the safe area.
6. Add the action item in the custom-action.xml file for the WTPart object
7. In the actionmodels.xml file find the model for the name in action report in this case "more action parts".
8. add the implementation part in the actionmodels.xml file.
9. add the url for jsp file in the actions.xml file.

**Import/Export Management**

manage the exchange of the data and metadata with other systems via XML files.

Info*Engine Administration

View, create and modify directory service entries.

Mapping Management

Manage mappings to be used during package import.

Personal Cabinets Administration

List the set of personal cabinets whose users have been deleted and delete those pers

Performance Advisor for PTC Windchill

Configure and review data sent by Performance Advisor for PTC Windchill.

Purge Management

Create and manage purge jobs.

Queue Management

Manage background queues and queue entries.

Server Status

Provides an overview of the status of key server processes.

System Configuration Collector

Gather existing information from your Windchill environment and optionally send the g

Task Delegate Administration

Create and manage task delegates and delegate repositories.

Worker Agent Administration

Display the status of WVS workers and allow you to start, stop and configure them.

Business Administration

Business Rules

View the business rules.

Indexing Administration

View the indexing status

Introduction to Numbering Schemes

View information on how to control numbers generated for objects.

Introduction to Versioning Schemes

View information on how to control identifiers generated for object versions.

Life Cycle Template Administration

Create and manage life cycle templates used for defining the phases and transitions of

Object Initialization Rules Administration

Create and manage XML rules for object initialization that set default values for attribut

Participant Administration

Support creation and modification of Windchill business objects describing users, grou

Policy Administration

Manage administrative domains and the access control, indexing, and notification polic

Preference Management

View and set preferences.

Promotion Preference Management

View, create, and edit promotion preferences.

Publish and Thumbnail Control

Controls WVS publishing.

Report Management

Create, update, and delete reports using the QueryBuilder tool. A report is the output o

Team Administration

Create and manage team templates. When creating a life cycle-managed object, you c

Type and Attribute Management

Manage type definitions, attribute definitions, measurement systems, and quantities of those attributes.

View Administration

Create and manage a network of available product structure views.

Visualization Configuration Administration

Manage WVS configurations including Creo View preferences, watermarks, printer con

Workflow Template Administration

Create and manage workflow templates used for automating processes, in which infor

Workflow Process Administration

Search for workflow processes and view activity and task level details. Restart stalled

WVS Job Monitor

View the status of WVS Jobs.

WVS Job Scheduler Administration

Create and execute WVS jobs.
